

HARRY WARD | SOFTWARE ENGINEER

- » Skills: TypeScript, JavaScript, React, Next.js, Node.js, Express.js, Prisma, PostgreSQL, MongoDB, Python, SQL, Tailwind CSS, Git
- » Portfolio: portfolio-harry-wards-projects.vercel.app
- » GitHub: github.com/harrywardy-cmd

»»» Professional Summary

Graduate Software Engineer with professional experience supporting enterprise technology environments and developing modern full-stack web applications using TypeScript, React, Next.js, Node.js, and PostgreSQL. Experienced designing and deploying scalable web applications, developing secure APIs, and building automation solutions that reduced manual operational workload by approximately 20%. Passionate about writing clean, maintainable code and delivering reliable software in collaborative Agile environments.

»»» Professional Experience

2024 – Present **IT Service Desk Analyst**

- » Collaborated with Digital & Technology teams at Grill'd Support Office to investigate production incidents, perform root cause analysis, and develop automation solutions that reduced repetitive manual tasks by approximately 20%.
- » Supported enterprise software deployments, user onboarding, system maintenance, and incident response for Grill'd's corporate and restaurant technology systems, ensuring reliable operations across a national hospitality organisation.

»»» Projects

2026 **Calorie Compass - (TypeScript · Prisma · PostgreSQL)**

- » Built a full-stack calorie tracking application featuring secure authentication, personalised nutrition goals, meal logging, and progress tracking using React, Next.js, Prisma, and PostgreSQL.
- » Deployed on Vercel with automated CI/CD, responsive design, and scalable REST APIs.

2025 **Lazuli E-Commerce Platform- (Next.js · Prisma · Stripe)**

- » Developed a production-ready e-commerce platform with authentication, shopping cart, inventory management, Stripe payments, and secure order processing.
- » Built reusable React components using Prisma ORM and PostgreSQL, with automated deployments through Vercel.

2026 **Personal Portfolio Website - (TypeScript · Tailwind CSS · React)**

- » Designed and developed a responsive portfolio showcasing software engineering projects, technical skills, and professional experience.
- » Built reusable React components, interactive animations, GitHub integration, and deployed with automated CI/CD using Vercel.

»»» Education

2021 – 2024 **Bachelor of Computer Science - Swinburne University**

- » Major: Software Development
- » Relevant Coursework: Advanced Web Development, Cloud Computing Architecture, Introduction to Artificial Intelligence, Software Testing and Reliability, Creating Secure and Scalable Software, Data Structures and Patterns
